An Unparalleled Experience

Cyber Eyez is an application for smart glasses enabling users with low vision and blindness to be more independent in a sighted world. Users can experience their world and get things done efficiently and independently. By using a high definition camera and an optical character recognition engine, Cyber Eyez provides highly accurate text recognition. Wearers can have any text read to them in real time with no internet connection while still maintaining privacy.

COMPETITIVE ANALYSIS CHART

M100 & M300 FEATURES

Real-time Magnification up to 15X with no lag!

Magnification helps in filling out important forms, signing receipts at a restaurant, watching TV at a distance and even getting a close-up view of your loved ones.

Read Text (OCR) in over 100 languages with no internet connection

Do you want to read your own mail? How about menus at restaurants? Important documents at your doctor's office? With Cyber Eyez you can in a matter of seconds!

Recognize over 16 billion objects right out of the box.

You read that right...16 Billion with a "B". There is no need to pre-train Cyber Eyez because we have already done it for you! We use the power of Google Images to recognize billions of objects right out of the box.

Identify over 1,500 colors

Want to know if that shirt is blue or black? How about if that dress is beige or brown? Cyber Eyez can recognize over 1,500 colors in any image giving you not only the exact color name, but the color family too because nobody knows what color "arcadia" is. (It's brown by the way.)

Mood Ring Mode

We are saving marriages all over the planet! Our mood ring mode gives you the ability to know if that person you are talking to is happy, sad, angry or surprised in a matter of seconds. Now you will always know if that last joke fell flat.

Bar Code Mode

Our brand-new bar code scanner is one of the best on the planet. It is based on computer vision, so no need to hunt for that bar code. Grab a can of soup and give it a spin...Cyber Eyez will find the bar code automatically, submit it to Google and read the first result back to you usually in less than a second!
